SAN FRANCISCO BAY AREA, CA

Job Application for Senior Golang Engineer

Dear All in Bits,

About Me

I am a heavy Golang user and have been working on go microservices and backends for 5 years. I live in Seattle, WA and have a 4 year old son who I hang out with in my free time. I have a few Golang tools I use personally all the time and my site keppylab.com runs on go as well.

Why Shrapnel?

I am looking for a position where I own/lead a backend team and build top notch go lang services and tools. I have deep interest in making blockchain transactions less expensive to the user, and enabling games to use blockchain tech. Through my first Golang project at a startup called Rumble Monkey, I implemented a blockchain for video game assets—all to say I have been working in this niche for some time.

Why Me?

Golang is my favorite language, I have a decade of solid work under my belt, and I am local to the Seattle area. If we mesh well, it could be a great fit.

Sincerely,

James Dominguez
