"In algorithms, as in life, persistence usually pays off." — Steven S. Skiena

Beautiful AI

March 15, 2024

1556 SANCHEZ STREET, SAN FRANCISCO

Job Application for Lead Software Engineer

Dear Beautiful AI Team,

About Me

I have been working in startups around the Seattle area for nearly a decade, sometimes as a founder and other times as a consultant. I am an AI2 incubator alumni and love building AI tooling and UIs that open up new possibilities for the user. I enjoy teaching and learning from others, and I firmly believe the strongest force multiplier is pair programming.

Why Beautiful AI?

Your team looks like a great group of people, and the vision for the product seems to mesh well with my core ideals around making AI more useful for more people.

Why Me?

My strong JavaScript/TypeScript skills, my extensive full stack experience, and my proficiency with various AI / ML architectures and implementations would make me a good fit on the technical side, but beyond that I think I could really nail this role based on what I've read on your site.

Sincerely,

James Dominguez
